

Sketch does more than write software.

We build solutions that make you more successful.

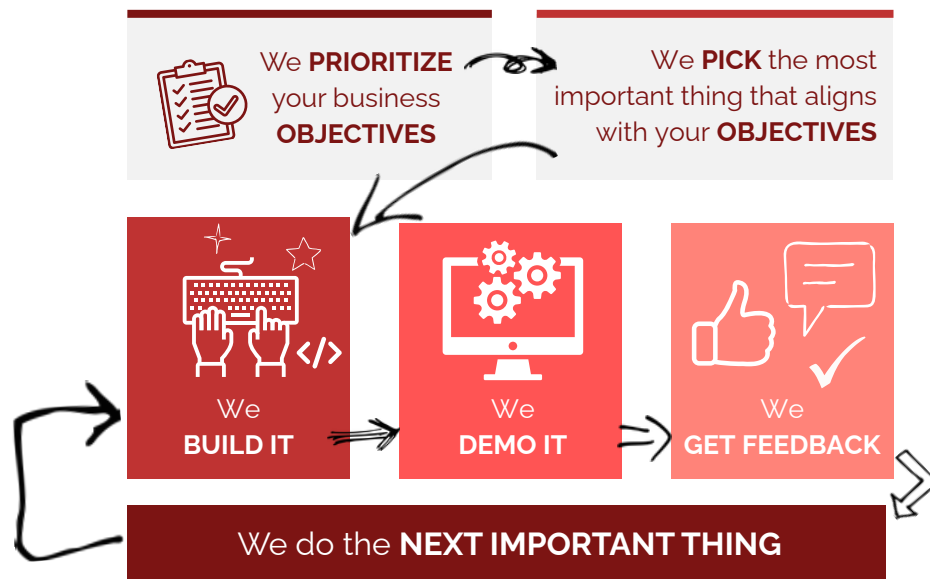

Creating amazing products requires a balance between engineering, experimentation, and design. Product engineers know how to start small and iterate to find effective solutions. Lots of developers can write code. Our teams help you achieve better outcomes.

Sketch brings this same mindset to everything, whether we're building custom software or helping teams get more from their Atlassian investment.

That's why we don't start with a fixed scope or track time for every tiny tweak. We prioritize ruthlessly and work toward solutions that make a difference.

How it Works

What There's None Of

-  **Long Contracts**
-  **Big, Ugly Scope Documents**
-  **Onboarding Periods**
-  **Detailed Budgets**

What You Get Instead

Adaptability and flexibility

Working software in two week sprints

Collaboration with your development team

Our Capabilities

LANGUAGES

CSS	Java	Objective-C
Elixir	.NET	Ruby on Rails
Go	Node.js	Forge
HTML	Swift	More...

MOBILE

iOS Native
 Android Native
 React Native
 Flutter

DEVOPS

Docker
 Jenkins
 Kubernetes
 GIT/SVN

DATABASES

MongoDB
 Oracle
